

SLUSH WET MIX INSTRUCTIONS

Each tank produces 2.5 gallons. Instructions below include the addition of alcohol, therefore 1.5 gallons of water, 64oz. Mix and 1.75 liter (0.46 gal) bottle of alcohol makes up the 2 ½ gallons of liquid per tank. If making a non-alcoholic mix, increase the amount of water to 2 gallons.

- Make sure that the machine is on a level surface.
- If an extension cord is needed, use at least a 12 gauge heavy duty extension cord.
- It will take about 1 hour for the machine to freeze properly; schedule accordingly.

Mixing Directions:

- Using the bucket provided, add ¾ gallon of water, 32 Oz. (1/2 container) of Mix and add ½ bottle of liquor.
- Repeat one more time per tank.
- Follow the procedure's as outlined in order for proper freezing.

Mix the following in 1
Gallon Container

Add ¾ Gallon of Water

32 oz. of Mix
(Mix comes in 64 oz.
container)

½ bottle of 1.75
Liter of Liquor
(Do not add more
Liquor than posted)

Mix these combinations two times per tank. This will provide 2 ½ gallons of slush mix per tank.

**** DO NOT ADD ICE TO THE TANKS. THE CUBES WILL DAMAGE THE AUGER. ****
